Ariba Account types
Differences Explained

Supplier Enablement Nouryon
20-10-2020

Ariba Account Types

Nouryon

- Since the introduction of SAP Ariba as Nouryon's cloud procurement solution in 2019, all NPR (indirect spend) suppliers of Nouryon receive Purchase Orders via the Ariba Network

- In order to process the Purchase Orders, we strongly advise your organization to create a supplier account on the Ariba Network. With an Ariba Network account you can adjust, amongst other things, notification settings and email addresses to ensure the Purchase Orders received from Nouryon can be easily processed.

- There are two types of Ariba Network accounts available:

  - **Standard Account – (no fees apply)**
  - **Enterprise Account – (fees apply)**

- The choice of the Ariba account type is entirely up to your organization. As Nouryon we can only advise and guide you, looking at the differences of the two accounts and what would fit best with strategy and needs. On the next page you can review a high level overview of the two account types.

- Read more about the the Ariba Account Types online ❼Ariba Website (accounts and pricing)

Standard Account Vs. Enterprise Account

Nouryon

Features	Standard Account	Enterprise Account
